Renewable energy.

Global roll-out of a risk awareness programme

Context

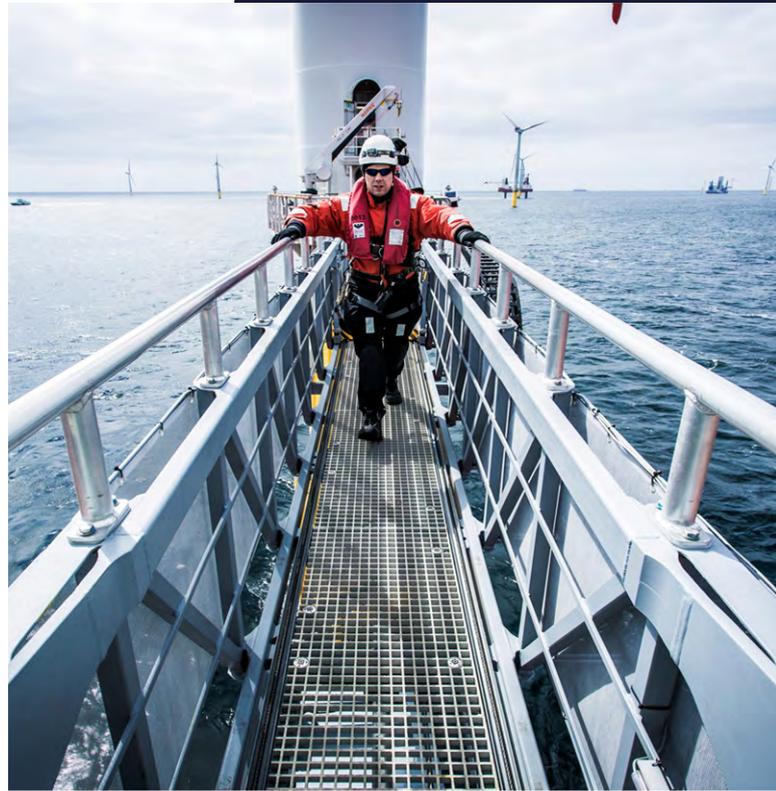

Our client is one of the global market leaders in offshore wind power industry, with employees and installations across the 5 continents. The company's activities encompass all aspects of the value chain, including innovation, development, manufacturing, installation, and service.

Challenge

Many employees work in small groups or on their own. Hence, improving awareness of risks is critical to their safety. Our client wanted to ensure that all employees have the right mindset about their decision-making every day.

Solution

In 2017 we began working in training and coaching people in the onshore as well as offshore business. In 2019 we focused on client's Offshore business unit on training 6,000 employees in developing greater risk awareness to improve safety. In 2020, a new global project involved most of the staff working at the company's manufacturing sites, offices, pre-assembly locations and installation personnel, and also encompassed bespoke workshops for 200 engineers. In early 2021 our client signed a 2-year framework agreement to extend the project and deploy the risk awareness programme to all +25,000 employees across the globe.

"Safety is our choice and we are proud to collaborate with dss+ in providing our employees with tools to prevent incidents by managing risks. Our number one focus is always safety because we place safety above anything we do. We want to ensure that all employees have the right mindset about their decision-making every day."

CEO of the company

Assignment

Design and expand a global program to develop a greater risk awareness, across all business units. Scope: Africa, Americas, Asia, Europe

Offering

dss+ Risk Factor™, Safety Assessments, High-Level Safety Roadmap, Training & Coaching for Leadership, Middle-Management and Engineering

Impact

- Risk incident rate reduced by 40% in one year, and the measure of leading indicators increased by 4-fold in the business unit that the project focused on
- One global training programme now engaging 25,000 employees
